

COMPLETE LIST OF CLAIMS

Claim 1 (**amended**): ~~Therapeutic compositions~~ A therapeutic composition for the symptomatic relief of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis in warm-blooded animals in need of such treatment said ~~compositions~~ composition comprising pharmaceutically effective amounts of active ingredients, said active ingredients consisting of carbetapentane tannate and guaifenesin.

Claim 2 (**previously presented**): A therapeutic composition as claimed in claim 1 in tablet form.

Claim 3 (**previously presented**): A therapeutic composition as claimed in claim 1 in suspension form.

Claim 4 (**previously presented**): A method for symptomatically treating and relieving the distress of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis in warm-blooded animals which comprises orally administering to warm-blooded animals in need of such treatment a therapeutic amount of a composition comprising pharmaceutically effective amounts of active ingredients, said active ingredients consisting of carbetapentane tannate and guaifenesin.

Claim 5 (**previously presented**): A method as claimed in claim 4 wherein said composition is in tablet form.

Claim 6 (**previously presented**): A method as claimed in claim 4 wherein said composition is a suspension.

Claims 7-14 (**cancelled**)

Claim 15 (**amended**): ~~Therapeutic compositions~~ A therapeutic composition for the symptomatic relief of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals in need of such treatment, said ~~compositions~~ composition comprising in tablet form pharmaceutically effective amounts of active ingredients and a pharmaceutically suitable carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 50 mg. to about 75 mg., per tablet, and guaifenesin in an amount of from about 100 mg. to about 300 mg., per tablet.

Claim 16 (**amended**): The therapeutic ~~compositions~~ composition of claim 15, wherein said ~~tablets contain~~ tablet contains about 60 mg. of carbetapentane tannate, per tablet, and about 200 mg. of guaifenesin, per tablet.

Claim 17 (**amended**): ~~Therapeutic compositions~~ A therapeutic composition for the symptomatic relief of cough associated with respiratory tract conditions resulting

from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals in need of such treatment, said ~~compositions~~ composition comprising a pharmaceutically effective amount of active ingredients suspended in a pharmaceutically suitable liquid carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 20 mg. to about 40 mg., per 5 ml. of suspension, and guaifenesin in an amount of from about 50 mg. to about 150 mg., per 5 ml. of suspension.

Claim 18 (**amended**): The therapeutic ~~compositions~~ composition of claim 17, wherein said ~~suspensions contain~~ suspension contains about 30 mg. of carbetapentane tannate, per 5 ml. of suspension, and about 100 mg. of guaifenesin, per 5 ml. of suspension.

Claim 19 (**previously presented**): A method for symptomatically treating and relieving the distress of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals which comprises orally administering to warm-blooded animals in need of such treatment a therapeutic amount of a composition comprising in tablet form pharmaceutically effective amounts of active ingredients and a pharmaceutically suitable carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 50 mg. to about 75 mg., per tablet, and guaifenesin in an amount of about 100 mg. to about 300 mg. guaifenesin, per tablet.

Claim 20 (**previously presented**): The method of claim 19 wherein said tablets

contain about 60 mg. of carbetapentane tannate, per tablet, and about 200 mg. of guaifenesin, per tablet.

Claim 21 (previously presented): A method for symptomatically treating and relieving the distress of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals which comprises orally administering to warm-blooded animals in need of such treatment a therapeutic amount of a composition comprising a pharmaceutically effective amount of active ingredients suspended in a pharmaceutically suitable liquid carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 20 mg. to about 40 mg., per 5 ml. of suspension, and guaifenesin in an amount of from about 50 mg. to about 150 mg., per 5 ml. of suspension.

Claim 22 (previously presented): The method of claim 21 wherein said suspension form contains about 30 mg. of carbetapentane tannate, per 5 ml. of suspension, and about 100 mg. of guaifenesin, per 5 ml. of suspension.

Claim 23 (amended): ~~Twice-a-day therapeutic compositions~~ A therapeutic composition for the symptomatic relief of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals in need of such treatment, said ~~compositions~~ composition comprising in tablet form pharmaceutically effective amounts of active ingredients and a pharmaceutically suitable carrier, said active ingredients consisting of

carbetapentane tannate in an amount of from about 50 mg. to about 75 mg., per tablet, and guaifenesin in an amount of from about 100 mg. to about 300 mg., per tablet, said pharmaceutically effective amount being one half the daily dosage.

Claim 24 (**amended**): The therapeutic ~~compositions~~ composition of claim 23, wherein said ~~tablets contain~~ tablet contains about 60 mg. of carbetapentane tannate, per tablet, and about 200 mg. of guaifenesin, per tablet.

Claim 25 (**amended**): ~~Twice-a-day therapeutic compositions~~ A therapeutic composition for the symptomatic relief of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals in need of such treatment, said ~~compositions~~ composition comprising a pharmaceutically effective amount of active ingredients suspended in a pharmaceutically suitable liquid carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 20 mg. to about 40 mg., per 5 ml. of suspension, and guaifenesin in an amount of from about 50 mg. to about 150 mg., per 5 ml. of suspension, said pharmaceutically effective amount being one half the daily dosage.

Claim 26 (**previously presented**): The therapeutic compositions of claim 25, wherein said suspensions contain about 30 mg. of carbetapentane tannate, per 5 ml. of suspension, and about 100 mg. of guaifenesin, per 5 ml. of suspension.

Claim 27 (previously presented): A method for symptomatically treating and relieving the distress of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals which comprises orally administering to warm-blooded animals in need of such treatment a therapeutic amount of a composition comprising in tablet form pharmaceutically effective amounts of active ingredients and a pharmaceutically suitable carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 50 mg. to about 75 mg., per tablet, and guaifenesin in an amount of about 100 mg. to about 300 mg. guaifenesin, per tablet, twice-a-day.

Claim 28 (previously presented): The method of claim 27 wherein said tablets contain about 60 mg. of carbetapentane tannate, per tablet, and about 200 mg. of guaifenesin, per tablet.

Claim 29 (previously presented): A method for symptomatically treating and relieving the distress of cough associated with respiratory tract conditions resulting from the common cold, bronchial asthma, and acute and chronic bronchitis, in warm-blooded animals which comprises orally administering to warm-blooded animals in need of such treatment a therapeutic amount of a composition comprising a pharmaceutically effective amount of active ingredients suspended in a pharmaceutically suitable liquid carrier, said active ingredients consisting of carbetapentane tannate in an amount of from about 20 mg. to about 40 mg., per 5 ml. of suspension, and guaifenesin in an amount of from about 50 mg. to about 150 mg., per 5 ml. of suspension, twice-a-day.

Claim 30 (**previously presented**): The method of claim 29 wherein said suspension form contains about 30 mg. of carbetapentane tannate, per 5 ml. of suspension, and about 100 mg. of guaifenesin, per 5 ml. of suspension.
